The Science of the Flavor of Whiskey: Unprecedented new flavors of bourbon created via a novel accelerated aging process!

Dr. Regan Silvestri is a Professor of Chemistry at Lorain County Community College, where he directs an undergraduate student research group investigating the science of the flavor of whiskey and the health benefits of beer. For fun, Professor Silvestri performs his science magic show “Magical Science!!” as a volunteer at local schools, and has inspired combined audiences of 50,000+ enthusiastic young students with the wonders of science.
