Scholarships

Every year the CTSC awards \$1,500 scholarships to the top STEM students from throughout Northeast Ohio. Applicants for these scholarships have been selected by their teachers as the best and brightest from their respective schools.

An independent committee of CTSC representatives evaluates the scholarship applications and selects recipients. All scholarships are merit-based.

Only CTSC Honor Juniors are eligible to apply for these scholarships. Honor Juniors are notified in January of their senior years with application information. Scholarships are presented to the students in late spring.

The number of scholarships awarded is totally dependent on donations from member societies as well as corporate and individual donors. Complete donor information can be found on our support page.
